[CIVIL APPEALS NOS: A-01-155-1998 & A-01-64-1999]
18 SEPTEMBER 2007

CIVIL PROCEDURE: *Pleadings - Amendment - Statement of defence
- Whether can be made at any stage of proceeding before pronouncement
of decision - Whether unlawful for third defendant to make application at
late stage - Whether trial judge correct to allow amendment*

D

TORT: *Negligence - Liability - Damages caused to plaintiff's land due
to collapse of hill and limestone rock debris from defendants' quarry land
- Trial judge dismissed plaintiff's application against defendants on
grounds collapse occurred when quarry was not in operation and was due
to natural causes - Whether learned judge's conclusion that first and second
defendants could not be held liable to plaintiff both in negligence and
nuisance correct*

E

F

CIVIL PROCEDURE: *Parties - Government, action against - Whether
suit against third defendant vexatious and frivolous - Whether on the
basis of s. 70 of National Land Code plaintiff could sue third defendant
- Whether s. 2(a) of Public Authorities Protection Act 1948 invoked*

G

The appellant/plaintiff filed two appeals against the decision of the High Court judge (i) allowing the third defendant's application to amend his statement of defence and (ii) in dismissing the plaintiff's claim against the three defendants. The plaintiff was the owner of a plant nursery situated on a piece of land and the first defendant was the operator of a quarry on a natural limestone hill ('Gunung Tunggal') on a plot of land situated adjacent to the plaintiff's land.

H

The second defendant was the registered owner of the quarry of land which was leased to the first defendant. The third defendant had issued a permit under s. 70 of the National Land Code to the first and second defendants allowing them to remove rock materials from the quarry land. On 29 December 1987, following

I

a heavy rainfall and severe thunderstorm, a large slice of the hill collapsed causing limestone rock debris to fall onto the plaintiff's land below and to spill over to the nursery virtually destroying it. Due to the damage caused to his land the plaintiff on 1 March 1988 filed a suit against the first and second defendants for negligence and nuisance. Subsequently, on 26 May 1992, the plaintiff brought in the third defendant, also for negligence and nuisance. After the close of the case of the defence but before judgment was pronounced by the court, the third defendant had applied to amend his statement of defence substituting the words 'Akta Prosiding Kerajaan 1956' with 'Public Authorities Protection Act 1948'. The plaintiff had strenuously objected to the application by contending that the third defendant's application was made at a very late stage, after all the parties had closed their cases and submissions had already been made and as such the application would be highly prejudicial to the plaintiff's case. After hearing arguments from both sides, the judge had allowed the defendant's application, hence the plaintiff's appeal against that decision. As for the claim against the first and second defendants, the High Court judge had applied the principle that in order to find a defendant liable in negligence or nuisance, the plaintiff must prove that the defendant's act was the effective cause of the injury or damage suffered. Based on this principle, the learned judge evaluated the evidence of the experts called by both parties and found that the report of the defendant's expert witness (DW2) to be consistent with the fact that the collapse occurred while the quarry was not in operation. The learned judge thus dismissed the plaintiff's claim against the three defendants. Dissatisfied, the plaintiff also appealed to this court.

Held (dismissing the appeals):

Per Azmel Maamor JCA delivering the judgment of the court:

- (1) It is a generally accepted principle that amendments to pleadings can be made at any stage of the proceeding before the pronouncement of the decision. It was not unlawful for the third defendant to make the application for amendment at this late stage even after the submission of the parties had been made. The defendant had made a genuine mistake in quoting the wrong statute in putting up the defence of limitation. Having regard to the nature and purpose of the

- A amendment which was merely to state the correct and proper statute dealing with limitation to government proceedings, there was no good reason to disturb the decision of the learned judge in allowing it. The learned judge had judicially exercised his discretion when he allowed the third defendant's
- B application to amend his statement of defence. (paras 10, 12, 13 & 14)
- (2) The second defendant was the holder of the permit to remove rock materials from the said land and was not at all involved in the operation of the quarry and the removal of rock materials which were solely carried out by the first defendant. The trial judge was correct in ruling that the second defendant could not be held liable to the plaintiff both in negligence and in nuisance. (paras 18 & 47)
- C
- D (3) The learned judge had taken into consideration that the collapse occurred while the quarry was not in operation as it had been shut down six days before the day of the collapse. The judge had also concluded that the collapse was more likely due to natural causes. The learned judge had given a
- E thorough and careful evaluation of the evidence of the witnesses and their reports. He had also given adequate reasons in his findings of facts and application of the laws of negligence and nuisance to the facts of this case. The learned
- F judge's conclusion that the first defendant could not be held liable to the plaintiff in negligence and nuisance was correct. (para 33 & 48)
- (4) On the basis of the provision of s. 70 of the National Land Code, the plaintiff should not have sued the third defendant. The suit against the third defendant was vexatious and frivolous. The Director of Land and Mines only possessed the power to issue permit for removal of rock material and was not given any supervisory power. It was too remote to say that he was under a duty to take care statutorily or at common law. Coupled with the unexplained delay on the part of the plaintiff in instituting action against the third defendant, a government officer, thereby legitimizing the application of s. 2(a) of the Public Authorities Protection Act 1948 to be invoked, it was glaringly improper for the plaintiff to continue to pursue the action against the third defendant. (para 49)

Bahasa Malaysia Translation Of Headnotes

A

Perayu/plaintif telah memfail dua rayuan terhadap keputusan hakim Mahkamah Tinggi kerana: (i) membenarkan permohonan defendan ketiga untuk meminda pernyataan pembelaannya; dan (ii) menolak tuntutan plaintif terhadap ketiga-tiga defendan. Plaintif adalah pemilik kepada satu tapak semaian pokok-pokok yang terletak di atas sebidang tanah, sementara defendan pertama adalah pengusaha sebuah kuari di atas sebuah bukit batu kapur ('Gunung Tunggal') di atas sebidang tanah yang terletak bersebelahan dengan tanah plaintiff. Defendan kedua adalah pemilik berdaftar kuari di atas tanah yang dipajak kepada defendan pertama. Defendan ketiga telah mengeluarkan permit di bawah s. 70 Kanun Tanah Negara kepada defendan-defendan pertama dan kedua membenarkan mereka untuk mengeluarkan bahan-bahan batu batan dari tanah kuari. Pada 29 Disember 1987, ekoran hujan lebat dan ribut kuat yang melanda, satu bahagian besar bukit telah runtuh sekaligus menyebabkan debri tanah dan batukapur menimbusi tanah plaintif di bawah, serta melimpah dan memusnahkan tapak semaian. Akibat kemusnahan yang menimpa tanahnya, plaintif, pada 1 Mac 1988, memfailkan guaman terhadap defendan pertama dan kedua kerana kecuaiian dan kacauganggu. Berikutnya, pada 26 Mei 1992, plaintif meluaskan tuntutan kepada defendan ketiga, juga kerana kecuaiian dan kacauganggu. Di penutup kes pembelaan, tetapi sebelum penghakiman diisytiharkan oleh mahkamah, defendan ketiga telah memohon untuk meminda pernyataan pembelaannya bagi mengganti perkataan 'Akta Prosiding Kerajaan 1956' dengan 'Akta Perlindungan Pihak Berkuasa Awam 1948'. Plaintif membantah keras permohonan sambil menyatakan bahawa permohonan defendan dibuat di peringkat yang terlalu lewat, iaitu selepas semua pihak telah menutup kes mereka dan mengemukakan hujah mereka masing-masing, di mana ia sangat memprejudiskan kes plaintif. Selepas mendengar hujah kedua-dua pihak, hakim membenarkan permohonan defendan sekaligus membangkitkan rayuan plaintif terhadap keputusan tersebut. Berhubung tuntutan terhadap defendan pertama dan kedua, hakim Mahkamah Tinggi telah menggunapakai prinsip bahawa untuk mendapati seseorang defendan bertanggung atas kecuaiian dan kacauganggu, plaintif hendaklah membuktikan bahawa perbuatan defendan merupakan penyebab efektif kepada kecederaan atau kerugian yang dialami. Berdasarkan prinsip ini, yang arif hakim telah menilai keterangan-keterangan pakar yang dipanggil oleh kedua-dua pihak dan

B

C

D

E

F

G

H

I

- A mendapati bahawa laporan yang dibuat oleh saksi pakar defendan (DW2) adalah konsisten dengan fakta bahawa keruntuhan berlaku semasa kuari tidak beroperasi. Yang arif hakim dengan itu menolak tuntutan plaintif terhadap ketiga-tiga defendan. Tidak berpuas hati, plaintif juga merayu kepada mahkamah ini.
- B **Diputuskan (menolak rayuan-rayuan):**
Oleh Azmel Maamor HMR menyampaikan penghakiman mahkamah:
- C (1) Sudah menjadi prinsip yang diterimapakai bahawa pindaan pada pliding boleh dibuat di mana-mana peringkat prosiding sebelum penghakiman dizahirkan. Tidak menjadi kesalahan bagi defendan ketiga untuk membuat permohonan pindaan di peringkat yang selewat ini walaupun sesudah pihak-pihak mengemukakan hujah mereka masing-masing. Defendan telah membuat satu kesilapan tidak disengajakan dengan mencatat statut yang salah apabila mengemukakan pembelaan penghadan. Mengambil kira sifat dan tujuan pindaan, iaitu untuk memperbetulkan statut yang berurusan dengan penghadan terhadap prosiding kerajaan, tiada alasan kuat untuk mengganggu keputusan yang arif hakim membenarkan pindaan. Yang arif hakim telah melaksanakan budibicaranya secara kehakiman bilamana beliau membenarkan permohonan defendan ketiga untuk meminda pernyataan pembelaannya.
- D
- E
- F (2) Defendan kedua adalah pemegang permit untuk mengeluarkan batu batan dari tanah tersebut dan langsung tidak terlibat dengan operasi kuari atau pengeluaran bahan batu tersebut yang dilakukan sepenuhnya oleh defendan pertama. Hakim bicara betul apabila memutuskan bahawa defendan kedua tidak boleh bertanggungjawab kepada plaintif atas kecuaiian atau kacauganggu.
- G
- H (3) Yang arif hakim telah mengambil pertimbangan bahawa keruntuhan berlaku sewaktu kuari tidak beroperasi kerana ia telah ditutup enam hari sebelum kejadian. Hakim juga memutuskan bahawa keruntuhan berkemungkinan disebabkan oleh faktor alam. Yang arif hakim telah menilai keterangan saksi-saksi dan laporan-laporan mereka dengan terperinci dan penuh teliti. Beliau juga telah memberikan sebab-sebab yang mencukupi berhubung dapatan-dapatan faktanya serta pemakaian undang-undang kecuaiian dan kacauganggu terhadap
- I

fakta kes. Rumusan yang arif hakim bahawa defendan pertama tidak boleh didapati bertanggungjawab terhadap plaintif kerana kecuai dan kacauganggu adalah betul.

A

- (4) Berdasarkan peruntukan s. 70 Kanun Tanah Negara, plaintif tidak seharusnya mendakwa defendan ketiga. Guaman terhadap defendan ketiga adalah remeh dan menyusahkan. Pengarah Tanah dan Galian hanya mempunyai kuasa untuk mengeluarkan permit bagi pengambilan batu batan dan tidak mempunyai apa-apa kuasa pengawasan. Adalah tidak munasabah untuk mengatakan bahawa beliau memikul tanggungjawab berjaga-jaga di sisi statut atau undang-undang common. Ditambah dengan kelewatan plaintif untuk mendakwa defendan ketiga, seorang pegawai kerajaan, yang sekaligus mengesahkan pemakaian s. 2(a) Akta Perlindungan Pihak Berkuasa Awam 1948, adalah nyata bahawa plaintif tidak seharusnya meneruskan tindakan terhadap defendan ketiga.

[Appeal from High Court, Ipoh; Civil Suit No: 22-58-1988]

Reported by Suhainah Wahiduddin

I

A

JUDGMENT

Azmel Maamor JCA:

B [1] The appellant/plaintiff filed two appeals against the decision of the learned High Court Judge. The 1st appeal was against the order of the learned judge allowing the 3rd defendant's application to amend his statement of defence substituting the words "Akta Prosiding Kerajaan 1956 (Semakan 1988" with "Public Authorities Protection Act 1948 (Act 198) (Revised 1978)." And the 2nd appeal was against the learned judge's decision dismissing the plaintiff's claims against the three defendants.

Background Facts

D [2] The plaintiff was the owner of a plant nursery called Fuh Lin Bud-grafting Centre situated on a piece of land held under Lot No. 32752, Mukim of Kampar, Perak. The 1st defendant was the operator of a quarry on a natural limestone hill called Gunung Tunggal on a plot of land held under Lot No. 74258, situated adjacent to the plaintiff's land. The 2nd defendant was the registered owner of the quarry land and he had leased it to the 1st defendant. The 3rd defendant had issued a permit under s. 70 of the National Land Code 1965 to the 1st and 2nd defendants allowing them to remove rock materials from the quarry land.

F [3] On both the southern and eastern faces of the hill were limestone overhangs over but not directly above the plaintiff's land. The plaintiff's nursery was situated some distance away from the hill slight away from the boundary of his land facing the hill.

G [4] On 29 December 1987 at about 6.30am following a heavy rainfall and severe thunderstorm, a large slice of the hill collapsed causing the limestone rock debris to fall onto the plaintiff's land below and to spill over to the nursery virtually destroying it. Due to the damage caused to his land the plaintiff on 1 March 1988 filed suit against the 1st and 2nd defendants for negligence and nuisance. Subsequently, on 26 May 1992, the plaintiff, brought in the 3rd defendant, also for negligence and nuisance.

I

[5] The hearing proceeded on with the plaintiff claiming against the three defendants. After the close of the case of the defence but before judgment was pronounced by the court, the 3rd defendant applied to amend his statement of defence. It was strongly objected to by the plaintiff. After hearing arguments from both sides the learned judge allowed the 3rd defendant's application. Hence the plaintiff's appeal against that decision.

[6] The learned judge, after having considered all the submission by counsel of all parties in the light of the evidence adduced in court, dismissed the plaintiff's claim against the three defendants. Dissatisfied with the decision, the plaintiff also appealed to this court.

The 1st Appeal

[7] This appeal was filed by the plaintiff who was dissatisfied with the decision of the learned judge allowing the 3rd defendant's application to amend his statement of defence. In this application the 3rd defendant only wanted to amend the relevant law as regards limitation in respect of proceeding against him, a government officer. In para. 5 of the statement of defence the 3rd defendant had originally stated "Akta Prosiding Kerajaan 1956 (Semakan 1988)." He now wished to amend it to read "Public Authorities Protection Act 1948 (Act 198) (Revised 1978)." That's all that the 3rd defendant wished to amend.

[8] But the plaintiff strenuously objected to the application. The main grounds raised by the plaintiff to object to the application were that the application was made at a very late stage, after all parties had closed their cases and submissions had already been made and as such the application would be highly prejudicial to the plaintiff's case.

[9] The relevant law governing amendments to pleadings is O. 20 r. 5 of the Rules of the High Court 1980 (RHC). It reads:

5. Amendment of writ or pleading with leave

(1) Subject to Order 15 rules 6, 7 and 8 and the following provisions of this rule, the Court may at any stage of the proceedings allow the plaintiff to amend his writ, or any party to amend his pleading, on such terms as to costs or otherwise as may be just and in such manner (if any) as it may direct.

A (2) Where an application to the Court for leave to make the amendment mentioned in paragraph (3), (4) or (5) is made after any relevant period of limitation current at the date of issue of the writ has expired, the Court may nevertheless grant such leave in the circumstances mentioned in that paragraph if it thinks it just to do so.

B (3) An amendment to correct the name of a party may be allowed under paragraph (2) notwithstanding that it is alleged that the effect of the amendment will be to substitute a new party if the Court is satisfied that the mistake sought to be corrected was a genuine mistake and was not misleading or such as to cause any reasonable doubt as to the identity of the person intending to sue or, as the case may be, intended to be sued.

C (4) An amendment to alter the capacity in which a party sues (whether as plaintiff or as defendant by counterclaim) may be allowed under paragraph (2) if the capacity in which, if the amendment is made, the party will sue is one in which at the date of issue of the writ or the making of the counterclaim, as the case may be, he might have sued.

D (5) An amendment may be allowed under paragraph (2) notwithstanding that the effect of the amendment will be to add or substitute a new cause of action if the new cause of action arises out of the same facts or substantially the same facts as a cause of action in respect of which relief has already been claimed in the action by the party applying for leave to make the amendment.

E [10] It has been a generally accepted principle that amendments to pleading can be made at any stage of the proceeding before the pronouncement of the decision. In the case of *Mahan Singh v. Government of Malaysia* [1973] 1 LNS 85, Sharma J in dealing with general principles of granting leave to amend pleadings quoted the decision of Bramwell LJ in the case of *Tildesley v. Harper* 10 Ch. D 386 at p. 397:

F My practice has always been to give leave to amend unless I have been satisfied that the party applying was acting *mala fide* or that, by his blunder, he had done some injury to his opponent which could not be compensated for by costs or otherwise.

G [11] In the same case Sharma J went on to quote the judgment of Brett MR in the case of *Clarapede & Co. v. Commercial Union Association* 32 WR 263:

I

However negligent or careless may have been the first omission and, however late the proposed amendment, the amendment should be allowed if it can be made without injustice to the other side. There is no injustice if the other side can be compensated by costs.

A

[12] Applying the above said principles to the present case, it is not unlawful for the 3rd defendant to make the application for amendment at this late stage even after the submission of parties had been made. However having regard to the nature and purpose of the amendment which was merely to state the correct and proper statute dealing with limitation to government proceedings and nothing else we could not find any good reason why we need to disturb the decision of the learned judge in allowing it. It is not in dispute that limitation had already been included by the 3rd defendant as a ground of his defence. As to the question whether the plaintiff could be compensated by costs we could not find from the records that the plaintiff had argued the point that such amendment if granted could not be so compensated. Having regard to the nature of the amendment we are quite convinced that no compensation is required to be made by the defendant at all.

B

C

D

E

[13] We are also satisfied that the 3rd defendant had made a genuine mistake in quoting the wrong statute in putting up the defence of limitation. It is true that Akta Prosiding Kerajaan 1956 is not the proper statute. The proper and correct statute is the Public Authorities Protection Act 1948.

F

[14] In our view the learned judge had judicially exercised his discretion when he allowed the 3rd defendant's application to amend his statement of defence. In the circumstances we therefore dismissed this appeal with costs.

G

The 2nd Appeal

[15] This 2nd appeal is consequential to the learned trial judge's decision dismissing the plaintiff's claims against all the three defendants. As stated earlier the plaintiff's claim against the defendants were for negligence and nuisance. As against the 1st and the 2nd defendants the particulars of negligence are as follows:

H

- (i) failure to develop benches on the quarry face;

I

- A** (ii) failure to take into account during blasting operation the vertical and horizontal cleavage plane on the limestone formation;
- (iii) failure to ensure that there was efficient drainage system between the hills and the main road;
- B** (iv) failure to ensure that the resultant strength of the ground was adequate to prevent collapse of the loose eastern duct of the hill;
- C** (v) failure to adopt proper blasting methods; and
- (vi) failure to take responsible steps to remove the hazards on the hill when they became aware of the said hazardous condition of the hill.
- D** [16] In respect of the 3rd defendant the particulars of the negligence are as follows:
- (i) failure to visit the site and to carry out proper investigations of the site to assess safely precautions before issuing the permit to extract rock materials under s. 70 of the National Land Code on 1 January 1987;
- E** (ii) allowing Gunung Tunggal to be quarried in 1987 even though the distance of the quarry to the Ipoh Kampar road was less than 200 metres, in contravention to the relevant guidelines issued by the Works Department that as a matter of safety no quarry operation can be conducted within 1 km (1000 metres) distance from any road;
- F** (iii) failure to give any due consideration to the safety for remedial aspect of the operation when the quarry progressed on the easterly direction towards Lot 32752 and the Ipoh Kampar Road;
- G** (iv) failure to take safety precaution to prevent the rock burst which could have been foreseen as early as 1.1.1987; and
- (v) failure to exercise its supervisory jurisdiction to check and monitor compliance of the conditions of the permits by the
- H**
- I** [17] As an alternative to the claims for negligence the plaintiff also alleged against the defendants that at the material time the collapse of the hill was a nuisance caused or permitted by each of the three defendants.

The Claim Against The 2nd Defendant

A

[18] The involvement of the 2nd defendant who was the owner of the land was that he was the holder of the permit to remove rock materials from the said land. That land had been leased to the 1st defendant. It is not in dispute that the 2nd defendant was not at all involved in the operation of the quarry and the removal of rock materials which were solely carried out by the 1st defendant. Therefore, on the claim for negligence based on the particulars as stated earlier the learned judge ruled there was totally no evidence to show the liability of the 2nd defendant in negligence. The learned judge also found no evidence to show liability in nuisance against the 2nd defendant.

B

C

The Claim Against The 1st Defendant – Negligence

[19] The main issue that the plaintiff has to prove against the 1st defendant on a claim for negligence is the casual connection between the 1st defendant's alleged careless conduct and the damages suffered by the plaintiff (the *causa causans*). In other words the plaintiff must show on a balance of probabilities that the cause of his misfortune was due to the acts or omissions of the 1st defendant.

D

E

[20] Before considering the arguments by both parties it is pertinent to state the sequence of events immediately before and after the collapse of the hill. There had been continuous rainfall prior to the collapse of the hill which happened on 29 December 1987. But the 1st defendant's quarry operation had stopped work since 23 December 1987 because of the Christmas and New Year holidays. Immediately after the collapse of the hill, the State Authority took over the control of the hill and caused the remaining unstable rocks to be removed by blasting so as to avoid further calamity.

F

G

[21] As regards the issue of *causa causans* both parties relied on the evidence of their respective expert witnesses.

H

The Plaintiff's Expert Witness

[22] The plaintiff called S. Pakianathan (PW1), a consultant in mining, mineral processing and metalurgical engineering to be his expert witness. PW1 made two visits at the site, namely on 12 January 1988 and 15 January 1988. Based on his two visits DW1 prepared a 63 page report (exh. P1) entitled "An Investigation of the Causes of Rockburst at Gunung Tungal, Perak."

I

- A [23] PW1 attributed the collapse of the hill which caused the damage to the plaintiff's nursery to a force known as "rockburst" which was found to have been brought about directly by the operation of the quarry. He defined "rockburst" to mean a case of disturbance of rock materials where strained energy or potential
- B energy within the rock is released or converted into Kinetic energy. This will create a tensible force within the rock mass resulting in rock materials in trying to pull itself apart.

[24] During his site visits PW1 made the following observations:

- C (1) Faults are widespread on remaining portion of Gunung Tunggal. Two types of fault were distinguished; (a) a shear fault due to compressions and running parallel to the strike of the bed (b) tension fault running obliquely across the hill.
- D (2) The blasting had been carried out at two points GS2 and GS4 (of the plan in the report) the strength reduces as the distance from the blast point increases. As vibrations arised from the two points there is the central zone which experiences a complex combination of the two vibrations. For purpose of discussion, these vibrations are transformed
- E into stress that contributes to the total operative stresses within the rock mass. (p. 22 of exh. P1).
- (3) That the quarry face had been developed in a manner that posed maximum danger to the Plaintiff's lot.

F **The Defendant's Expert Witnesses**

- [25] In disagreeing with the evidence of PW1, the 1st defendant called two expert witnesses namely, Senathi Rajah (DW1), a former consultant geologist and Chow Weng Sum (DW2), a
- G government geologist attached to the Geological Survey Department Malaysia based in Ipoh. In 1987 DW2 was the officer who was assigned to investigate into the collapse of the hill.

- [26] In his evidence DW1 explained that a rockburst and a rockfall are two completely different phenomena. In his opinion the
- H collapse of the hill at Gunung Tunggal was due to a rockfall and not a rockburst.

- [27] DW2 agreed with DW1 that the cause of the collapse was not due to rockburst but due to rockfall. In his evidence DW2
- I stated that he went to the site on 29 December 1987 at 9am barely two and a half hours after the incident actually took place. He also made several visits after that 1st visit. Based on those

visits DW2 observed that faults had existed on north south line on the hill and that there had been unstable overhangs on both the southern and eastern face (ie, the face facing the plaintiff's land). The overhangs came about by fluctuation of sea level or by rain water erosion over a period of time undercutting the base of the hill. Because of the undercutting at the base of the hill, the top part of the hill lost its vertical support. DW2 also prepared a report on the incident (exh. D3).

[28] The relevant part of DW2's report contained his finding relating to the cause of the collapse of the hill. It states:

Factors leading to rockfall:

Due to the chemical composition of limestone, weathering along planes of weakness such as shears, joint faults, is a natural long term process of denudation on the limestone hills. The cohesive strength across such planes of weakness is reduced and subsequently fails to support the rock slabs or blocks, thus giving rise to a rockfall.

Apart from the geological factors mentioned above, a number of secondary causes could also have hastened the rockfall and they are:

- (a) incessant rain which can loosen the rock mass;
- (b) vibrations caused by blasting in the quarry.

In the case of Gunung Tunggul, the 1st rockfall occurred at the southern end of Gunung Tunggul, the first rockfall occurred at the southern end of the hill where a prominent limonite – stained joint striking 075 degree and dipping 80 degrees NNW intersected the base of an overhang giving rise to a slab of rock positioned in an unstable state (see figure 6).

The incessant rain for the past few months reduced further the cohesive strength between the parent cliff and the overhanging. Regular variations caused by blasting activities in the quarry about 50 to 100 metres away further aggravated the situation and on the morning of 20th December 1987, the supporting forces holding the overhang gave way.

The first rockfall upset the equilibrium of the eastern face, triggering off a chain of massive rockfalls along the unstable eastern face of Gunung Tunggul (see figure 7).

- A [29] In his evidence DW2 did not agree with the finding of the plaintiff's expert witness, PW1, that the collapse of the hill was caused by a rockburst. According to DW2 a rockburst is caused by highly stressed rock or rapid instantaneous release of strained energy. This could occur at a tunnel or a mine because of the pressure of the mass of rock above the ground. On the other hand a rockfall is caused by gravity at the point where faults normally occur, a rockburst can occur anywhere in the rock where the energy is concentrated.
- B
- C [30] It was DW2's view that the report of PW1 (plaintiff's expert) was not accurate because he did not have the benefit of a geological plan of the area and without such plan PW1 would not be able to locate precisely where the rockfall had occurred. The map used by PW1 (exh. P1(a)) attached to his report only showed distribution of rock debris and location of the remaining hill after the incident. Therefore it lacked the vital information as to the dip direction and dip angle of the fault and no major joints or fractures were mapped out. In his report, DW2 was able to map out all positions of the various faults, fractures and major joints of the hill and details of the dip and strike direction and had incorporated those maps into his report (Rajah 1 to 7). In other words the report of DW2 was very much more comprehensive than the one produced by PW1. Even though DW2 did not rule out that vibration from blasting could possibly be a cause of the collapse but he maintained that the primary factor was attributable to natural causes.
- D
- E
- F

- [31] Hence there appear to be two conflicting opinions between the opposing parties' expert as to what had caused the collapse of the hill. According to the plaintiff's expert witness (PW1) the collapse was caused directly, by the vibrations from blasting of rocks by the 1st defendants quarry. On the other hand, the defendant's experts attributed the collapse to the latent defects of the hill itself as manifested in the many faults and joints and unstable overhangs which ultimately over a period of time would lead to collapse, and the vibrations from the quarry operations being merely a secondary factor which might have aggravated the collapse.
- G
- H

I

Finding Of The High Court

A

[32] In his judgment the learned judge applied the principle that in order to find a defendant liable in negligence or nuisance the plaintiff must prove that the defendant's act was the effective cause of the injury or damage suffered. Based on this principle the learned judge proceeded to evaluate the evidence of the experts called by both parties. The main factor that he applied in determining whose evidence to accept was the meaning of the term "Rockburst" and "Rockfall". As has been said above the plaintiffs expert attributed the collapse due to rockburst, whereas the 1st defendant's experts maintained that the collapse was due to rockfall and the primary factor being natural causes. As to the distinction between what constitutes "rockburst" and what constitutes "rockfall" the learned judge relied on the explanation given by Senathi Rajah (DW1) who made reference to the Glossary of Geology, by Ian Campbell, a publication of the American Institute of Geology which explanation the learned judge accepted to be correct and accurate:

B

C

D

"rockburst". A sudden and often violent breaking of a mass of rock from the walls of a quarry tunnel, mine or other near surface or underground opening, caused by failure of highly stressed rock and the very rapid or instantaneous release or accumulated strained energy, often with closure of or projection of broken rock into the opening and accompanied by ground tremours, rockfalls and air concussion. Rockbursts are not likely to occur until a depth of 1000 metres (about 3000 feet) below the surface is reached.

E

F

"rockfall" – (a) the relatively free falling or precipitous movement of newly detached segment of bedrock (usually massive homogeneous or jointed) of any size from a cliff or other very steep slope; it is the fastest moving landslide and is almost frequent on mountain areas and during spring when there is repeated freezing and thawing. Movement may be straight down, or a series of leaps and bounds down the slope; it is not guided by an underlying slip surface.

G

H

(b) the mass of rock moving in or moved by a rockfall; a mass of fallen rock.

[33] In his evaluation the learned judge took into consideration that the collapse occurred six days after the quarrying operation had been shut down for Christmas and New Year holidays. His Lordship held the view that PW1's opinion that the cause of the

I

- A collapse due to rockburst was untenable as at the time of incident the quarry operation had already shut down for six days. It would only be considered tenable if at the time of the collapse the quarry operation was in progress.
- B [34] On the other hand he found the postulation of DW2 to be fairly straight forward, firm in reasoning and was consistent with the fact that the collapse occurred while the quarry was not in operation. The learned judge also found the DW2's report to be a product of a careful and unbiased and independent study
- C commissioned by a government department which commenced almost immediately after the collapse and undertaken without any forethought of litigation. After having considered the entire evidence, the learned judge concluded that the collapse could not be caused by rockburst but more likely due to rockfall as explained
- D by DW2. As such the learned judge ruled that the plaintiff's claim in negligence against the 1st defendant must fail.

The Plaintiff's Claim against The 1st Defendant-Nuisance

- E [35] The learned trial judge held the view that our courts have been applying the civil law to include the English common law system by virtue of s. 3 of the Civil Law Act 1956. Those common law of England existing after the coming into effect of the Act would not be applicable. Hence the common law of nuisance that existed in England before 7 April 1956 (date of enforcement)
- F would be applicable in this country. However the counsel for the plaintiff, contended that the principle developed in the English Court of Appeal case of *Leakey & Ors v. National Trust for Places of Historic or Natural Beauty* [1980] 1 All ER 17 should be applied in this country.
- G [36] The development of the law of nuisance brought by the *Leakey* case is as follows. Prior to the *Leakey* case to succeed in nuisance the plaintiff must prove that the harm he suffered is the effect of the defendant's activity. The *Leakey* case had extended the area of liability of the defendant to include known or
- H foreseeable damage or injury to other person or property. The learned judge ruled that the extended principle in the *Leakey* case is not applicable in this country. Hence the liability of the 1st defendant on a tort of nuisance against the plaintiff would have to be based on the effect of the 1st defendant's activities on the
- I plaintiff. Since the damage to the plaintiff's land was not caused by the 1st defendant's quarry operation the learned judge ruled that the 1st defendant was not liable.

[37] But the learned judge went on to consider that even assuming that the principle in the *Leakey* case is applicable in this country it would be incumbent upon the plaintiff to show that the 1st defendant knew or ought to have known that the hill would collapse and having known of it had not done what was reasonable under the circumstances to prevent or minimise the risk of foreseeable damage to the plaintiff's land. In the instant case the learned judge found no such knowledge had been adduced on behalf of the plaintiff at the hearing. The learned judge went on to say that to succeed under the *Leakey* principle the plaintiff must prove knowledge and not merely the foreseeability that the hill would collapse.

The Plaintiff's Claim Against The 3rd Defendant

[38] The 3rd defendant is the Director of Land and Mines for the State of Perak. Two basic line of defence were put up by the 3rd defendant, firstly, the power to grant the permit under s. 70 of the National Land Code does not carry with it the responsibility to supervise the operational aspect of quarrying. And, secondly, by virtue of s. 2(a) of the Public Authorities Protection Act 1948 (PAPA), the plaintiff's action against the 3rd defendant had far exceeded the allowable period of 36 months from the date of incident.

[39] The collapse of the hill happened on 29 December 1987 but the 3rd defendant was only brought in as a party on 16 May 1992, a period of more than four years. It had far exceeded the 36 months period allowed by s. 2(a) of PAPA which reads:

Where after the coming into force of the Act, any suit, action, prosecution or other proceeding is commenced in the Federation against any person for any act done in pursuant or execution or intended execution of any written law or of any public duty or authority or in respect of any alleged neglect or default in the execution of any such written law, duty or authority the following provision shall have effect:

- (a) the suit, action, prosecution or proceeding shall not lie or be instituted unless it is commenced within 36 months next after the act, neglect or default complained of, or in the case of a continuance of injury or damage within 36 months next after the ceasing thereof.

- A [40] Despite the clear provisions of s. 2(a) of PAPA the counsel for the plaintiff maintained that the damage suffered by the plaintiff had not ceased and was still continuing at the time the suit was filed and therefore came within the ambit of the proviso “a continuance of injury or damage, within 36 months” of the same
- B section. However the learned judge totally rejected such argument. In his judgment the learned judge found that there was no repetition of the acts either in negligence or nuisance, after the collapse of the hill.
- C [41] As regards the duty of the 3rd defendant in the issuance of the permit under s. 70 of the National Land Code the learned judge relied on the evidence of Hj. Ahmad b. Mat Jita, Timbalan Pendaftar Hak Milik Perak (DW6). He was a senior officer familiar with the issuance of permits of the nature that was issued to the
- D 1st defendant.
- E [42] According to PW6, in deciding whether to grant such permit the only matter to be considered was the status of the land on which the rock material was to be removed, the quantity of rock material that would be extracted from the land, and the length of time to be taken to transfer the rock material from the land as the permit would be valid only for a certain period. It was not the statutory duty of the 3rd defendant to ensure the safety aspect of the quarry operation. The purpose of the issuance of the permit
- F under s. 70 of the National Land Code is for the removal of rock material and not for giving permission to operate the quarry.
- G [43] Based on such evidence the learned judge ruled that the permit was issued by the 3rd defendant only in respect of the removal of rock material from the land and not for the operation of the quarry.
- H [44] However the plaintiff’s counsel contended that based on the English Court of Appeal case of *Anns & Ors. v. London Borough of Merton* [1997] 2 All ER 492, which ruled that a statutory body conferred with the power (but not the duty) to supervise, may not be under a statutory duty of care but it may still be possible to attribute the common law duty of care to it.
- I [45] On such contention the learned judge was of the view that the principle in the *Anns* case can be distinguished from the instant case, since the facts are completely different. In the *Anns* case the Borough of Merton was conferred with the power to

supervise the construction of the building, whereas in the instant case the 3rd defendant was merely conferred with the power to issue permit without any power to supervise the removal of rock material. Hence there was no duty of care to ensure that the rock materials were adequately supervised under the common law could exist under the circumstances.

[46] As regard the plaintiff's claim against the 3rd defendant in nuisance the learned judge ruled that it was plain and obvious that the 3rd defendant could not be held liable in the light of the fact that he was neither the occupier of the land where the nuisance was alleged to have originated nor was he the cause of such nuisance.

Finding Of This Court

(a) Plaintiff's Claim Against The 2nd Defendant

[47] In view of the undisputed fact that the 2nd defendant was merely the registered owner of the land which he had leased to the 1st defendant, who became the absolute occupier, we totally agree with the ruling of the learned trial judge that the 2nd defendant could not be held liable against the plaintiff both in negligence and in nuisance as he was not at all involved in the quarry operation nor in the removal of rock materials. We therefore dismissed the appeal with costs.

(b) Plaintiff's Claim Against The 1st Defendant

[48] The learned judge had made a very comprehensive consideration of the facts relating to this matter and had given a thorough and careful evaluation of the evidence of the witnesses especially those expert witnesses and their reports.

He had also given adequate reasons in his finding of facts and application of the laws of negligence and nuisance to the facts of this case. We totally agree with him. As such we find no reason whatsoever to disagree with the learned judge's conclusion that the 1st defendant could not be held liable to the plaintiff in negligence and in nuisance. We therefore dismissed the plaintiff's appeal against the 1st defendant with costs.

A (c) *Plaintiff's Claim Against The 3rd Defendant*

[49] On the basis of the provision of s. 70 of the National Land Code the plaintiff should not have sued the 3rd defendant at all. In our view the suit against the 3rd defendant was vexatious and frivolous as it is very clear that the Director of Land and Mines only possessed the power to issue permit for removal of rock material. He was not given any supervisory power under s. 70 of the Act. It is too remote to say that he is under a duty to take care statutorily or at common law. Coupled with the unexplained delay on the part of the plaintiff in instituting action against the 3rd defendant, a government officer, thereby legitimatizing the application of s. 2(a) of the Public Authorities Protection Act to be invoked, it became glaringly improper for the plaintiff to continue to pursue the action against the 3rd defendant. We therefore rule that the appeal against the 3rd defendant be dismissed with costs.
